Body-on-frame is an automobile construction method where a separate body is mounted on a relatively rigid frame or chassis carrying the engine and drivetrain. The original method of building automobiles, body-on-frame construction is now used mainly for pickup trucks and SUVs.. In the late 19th century the frames, like those of the carriages they replaced, might be made of wood (commonly ash ...

A vehicle frame, also known as its chassis, is the main supporting structure of a motor vehicle, to which all other components are attached, comparable to the skeleton of an organism.. Until the 1930s virtually every car had a structural frame, separate from its body. This construction design is known as body-on-frame. Over time, nearly all passenger cars have migrated to unibody construction ...
