sification, along with a material mixing action for better material and temperature uniformity; and the metering zone, generally of constant, shallow-flight depth, provides the final shear heating and mixing of the melt. After the melt passes through the metering section and a check valve at the end of the screw, it joins the melt pool in front

Engineering Materials Msc. Shaymaa Mahmood ù" Figure 7. Classification of natural materials. Factors affecting materials properties: The following are the more important factors which can be influence the properties and performance of engineering materials.

### **Engineering Materials Msc. Shaymaa Mahmood Introduction to**

It includes an illustrated glossary, a collection of engineering tables and data, and a guide to materials selection. Sections 2 through 7 focus on polymeric materials--plastics, elastomers, polymer-matrix composites, adhesives, and sealants--with the information largely updated and expanded from the first three volumes of the Engineered Materials Handbook.
