International Journal of Information and Communication Sciences (IJICS) is a bimonthly open-access, peer-reviewed journal published in English-Language by Science Publishing Group. It publishes manuscripts about the latest outstanding developments in the field of communications engineering. Fast circulation of publication and quality of manuscript are important for both contributors and readers.

International Journal of Information and Communication

International Journal of Distributed Sensor Networks (IJDSN) is a JCR ranked, peer-reviewed, open access journal that focuses on applied research and applications of sensor networks. A large number of important applications depend on sensor networks interfacing with the real world.

International Journal of Distributed Sensor Networks

The International Journal of Control, Automation, Communication and Systems (IJCACS) is an open access control journal that publishes articles which contribute new results in all areas of Control Engineering, Automation, Communication and Systems with focus on technical and practical aspects of Control Engineering and its Applications.

International Journal of Control, Automation

Engineering Science and Technology, an International Journal (JESTECH) (formerly Technology), a peer-reviewed quarterly engineering journal, publishes both theoretical and experimental high quality papers of permanent interest, not previously published in journals, in the field of engineering and applied science which aims to promote the theory and practice of technology and engineering.

Engineering Science and Technology, an International Journal

Journal of Electrical and Electronic Engineering (JEEE) , a peer-reviewed open access journal published bimonthly in English-language, aims to foster a wider academic interest in electrical and electronics engineering, including its intersection with physics. The journal publishes original research papers, with emphasis on theoretical and experimental work.

In radio, multiple-input and multiple-output, or MIMO (/ Ě^ m aÉ^a m oĚŠ, Ě^ m iĚ• m oĚŠ /), is a method for multiplying the capacity of a radio link using multiple transmit and receive antennas to exploit multipath propagation. MIMO has become an essential element of wireless communication standards including IEEE 802.11n (Wi-Fi), IEEE 802.11ac (Wi-Fi), HSPA+ (3G), WiMAX (4G), and Long Term ...
