Mechanical engineering is the discipline that applies engineering, physics, engineering mathematics, and materials science principles to design, analyze, manufacture, and maintain mechanical systems. It is one of the oldest and broadest of the engineering disciplines.. The mechanical engineering field requires an understanding of core areas including mechanics, dynamics, thermodynamics ...

Stress is the force per unit area on a body that tends to cause it to change shape.. Stress is a measure of the internal forces in a body between its particles. These internal forces are a reaction to the external forces applied on the body that cause it to separate, compress or slide. External forces are either surface forces or body forces. Stress is the average force per unit area that a ...

As you know, the CFEMA has been working on a standard vehicle inspection form. We felt that due to some unfortunate incidents throughout the country with apparatus, that a standard, simple form, to be used by the drivers, similar to one used by truck drivers in the private sector, can be used to catch possible problems with apparatus before a serious problem occurs.
