A process flow diagram (PFD) is a diagram commonly used in chemical and process engineering to indicate the general flow of plant processes and equipment. The PFD displays the relationship between major equipment of a plant facility and does not show minor details such as piping details and designations. Another commonly used term for a PFD is a flowsheet

In education, response to intervention (commonly abbreviated RTI or Rtl) is an approach to academic intervention used in the United States to provide early, systematic, and appropriately intensive assistance to children who are at risk for or already underperforming as compared to appropriate grade- or age-level standards. RTI seeks to promote academic success through universal screening, early ...

Despite the lack of international agreement regarding the definition and classification of fiber, there is established evidence on the role of dietary fibers in obesity and metabolic syndrome. Beta glucan ( $\beta$ -D-glucan) is a soluble fiber readily available from oat and barley grains that has been gaining interest due to its multiple functional and bioactive properties.

ABSTRACT. The aim of this review was to summarize some aspects of interest of the bacterium *Pseudomonas fluorescens* Migula, its function as a biological control agent and its recent action as a crop pathogen. Its use as a biological control agent, for bioremediation, and its recently known capacity of infecting plant tissues, have made them an object of several studies around the world.
